

Cambrian College

School of Business and Information Technology, Creative Arts, Design, Music and Hospitality

Course Outline

Course Title	Foundations of B.A.				
Course Code:	BTA1002	Credit Value:	4	Credit Hours:	56
Programs:	BAGC I.T. Business Analysis ITPT I.T. Business Analysis - Pt MAHW Mobile Application Development - Hanson MAPD Mobile Application Development				
Equivalencies		Prerequisites		Corequisites	

This course may be delivered in a variety of different formats: 100% in-class, 100% online (or a blend of both), videoconferencing, distributed learning or off-campus. Please confirm with your faculty member which format will be used for your section of this course.

General Education Course:

☐

Eligible for PLAR:

☒

COURSE DESCRIPTION

In this course, students will define the role of the IT Business Analyst. This course is an overview of the extensiveness of the business analysis profession and is a critical look at the broader context of the body of knowledge required to perform this work. Cases will be discussed, opinions formed, defended, and challenged in order to better grasp the relationships between people, projects, the business, and the technical environment. A secondary focus on leading organizational change will allow the learner to examine the Business Analyst role as that of a change agent. Current best practices in guiding people through constant change are discussed.

Date:

May 27, 2020

Prepared By:

Nathan Abourbih

Approved by:

BRIAN LOBBAN

Dean, School Of Business And Information Technology,
Creative Arts, Design, Music And Hospitality

Effective:

Fall 2020, Winter 2021, Spring 2021

RELATIONSHIP TO PROGRAM VOCATIONAL LEARNING OUTCOMES

PROGRAM LEVEL	
This course contributes to your program by allowing you to demonstrate the following vocational learning outcomes:	
Program(s)	Vocational Learning Outcomes
I.T. Business Analysis	College Standards 1. Document business processes using effective and established research and documentation methods and business improvement procedures. 2. Plan and manage the requirements gathering activities throughout the requirements process for changes to a business system 3. Analyze the information collected during the requirements elicitation to identify gaps and define the capabilities of an acceptable solution using appropriate methods, tools, techniques and documentation. 4. Document business requirements in accordance with standard business practices. 5. Communicate the results of business requirements analysis and documentation to a broad and diverse audience using appropriate communication tools and styles. 6. Develop test strategies to ensure that business requirements and stakeholder objectives for changes to a business system are met. 7. Apply negotiation and problem-solving skills to build effective stakeholder alignment.
I.T. Business Analysis - Pt	College Standards 1. Document business processes using effective and established research and documentation methods and business improvement procedures. 2. Plan and manage the requirements gathering activities throughout the requirements process for changes to a business system. 3. Analyze the information collected during the requirements elicitation to identify gaps and define the capabilities of an acceptable solution using appropriate methods, tools, techniques and documentation. 4. Document business requirements in accordance with standard business practices. 5. Communicate the results of business requirements analysis and documentation to a broad and diverse audience using appropriate communication tools and styles. 6. Develop test strategies to ensure that business requirements and stakeholder objectives for changes to a business system are met. 7. Apply negotiation and problem-solving skills to build effective stakeholder alignment.
Mobile Application Development - Hanson	College Standards 1. Evaluate business and design requirements to select, formulate and implement mobile solutions.

Program(s)	Vocational Learning Outcomes
	2. Use project management principles and industry protocols to manage a collaborative mobile application development and to ensure quality assurance. 3. Design, develop and build a database to application specifications.
Mobile Application Development	College Standards 1. Evaluate business and design requirements to select, formulate and implement mobile solutions. 2. Use project management principles and industry protocols to manage a collaborative mobile application development and to ensure quality assurance. 3. Design, develop and build a database to application specifications.

COURSE CURRICULUM

Topics/Concepts Covered in This Course

- IT Business Analysis Body of Knowledge (BABOK)
- Terms of Reference: Audience, Project, Business Environment, and Technical Environment
- Overview of Business Analysis Techniques
- The SDLC
- Requirements Elicitation
- UML Diagramming Use Cases
- UML Diagramming Class Diagrams
- Traditional Requirements Gathering

COURSE LEVEL: Learning Outcomes and Objectives	
To earn credit for this course, you must reliably demonstrate your ability to:	
Learning Outcome	Objectives
1. Describe the overall concept of software development and systems analysis using the SDLC versus using iterative development.	1.1 Describe the purpose of systems analysis and design when developing information systems 1.2 Explain the purpose of the System Development Life Cycle (SDLC) and identify its six core processes 1.3 Explain how information system methodologies provide guidelines for completing the six core processes of the SDLC 1.4 Describe the characteristics of Agile methodologies and iterative system development 1.5 Use a business system example to: 2.5.1 Describe how the six core processes of the SDLC are used in each iteration 2.5.2 Identify key documents used in planning a project 2.5.3 Identify and interpret key diagrams used in systems analysis and systems design

Learning Outcome	Objectives
2. Gather information and document system requirements.	2.1 Describe the activities of systems analysis 2.2 Explain the difference between functional and nonfunctional requirements 2.3 Identify and understand different kinds of stakeholders and their contributions to requirements definition 2.4 Describe information-gathering techniques and determine when each is best applied 2.5 Describe the role of models and UML (Unified Modeling Language) in systems analysis 2.6 Develop UML activity diagrams to model workflows
3. Illustrate and categorize how people interact with a system.	3.1 Explain why identifying user stories and use cases is the key to defining functional requirements 3.2 Write user stories with acceptance criteria 3.3 Describe the two techniques for identifying use cases 3.4 Apply the user goal technique to identify use cases 3.5 Apply the event decomposition technique to identify use cases 3.6 Describe the notation and purpose for the use case diagram 3.7 Draw use case diagrams by actor and by subsystem
4. Model problem domains by choosing and creating appropriate diagrams.	4.1 Explain how the concept of “things” in the problem domain also defines requirements 4.2 Identify and analyze data entities and domain classes needed in the system 4.3 Read, interpret, and create an entity-relationship diagram 4.4 Read, interpret, and create a domain model class diagram 4.5 Understand and interpret the domain model class diagram for the RMO Consolidated Sales and Marketing System 4.6 Read, interpret and create a state machine diagram that models object behavior
5. Develop comprehensive system requirements.	5.1 Write fully developed use case descriptions 5.2 Develop activity diagrams to model flow of activities 5.3 Develop system sequence diagrams 5.4 Use the CRUD (Create, Read, Update, Delete) technique to validate uses cases 5.5 Explain how use case descriptions and UML diagrams work together to define functional requirements
6. Describe the overall systems design process.	6.1 Describe system design and contrast it with systems analysis

Learning Outcome	Objectives
	6.2 List documents and models used as inputs to or output from systems design 6.3 Explain each major design activity 6.4 Describe security methods and controls
7. Describe system architecture components and environments.	7.1 Explain architectural concepts that influence system design, including ubiquitous computing and software, components, protocols, interoperability, and distributed architectures 7.2 Describe and draw location, network, and deployment diagrams 7.3 Describe a system's environment by drawing architectural diagrams and answering key questions 7.4 Design larger application components based on use cases and other analysis models
8. Contrast this textbook's approach to requirements with the traditional approach.	8.1 Explain how the traditional approach and the object-oriented approach differ when modeling the details of a use case 8.2 List the components of a traditional system and the symbols representing them on a data flow diagram 8.3 Describe how data flow diagrams can show the system at various levels of abstraction 8.4 Develop data flow diagrams, data element definitions, data store definitions, and process descriptions 8.5 Develop tables to show the distribution of processing and data access across system locations
9. Design a user interface to meet system goals.	9.1 Explain the concepts of user experience, user interface, and usability 9.2 Describe the metaphors that can be used to assist in user-interface design 9.3 Describe important characteristics of human-interface objects that affect usability. 9.4 Discuss the important principles of navigation through a software application 9.5 Create storyboards to show the sequence of forms used in a dialog 9.6 Describe important guidelines in user-interface design for desktop applications 9.7 Describe important guidelines in user-interface design for mobile devices 9.8 Design printed and on-screen reports appropriate to users' needs
10. Compare various approaches to software construction and modelling.	10.1 Compare the underlying assumptions and uses of a predictive and an adaptive system development life cycle (SDLC)

Learning Outcome	Objectives
	10.2 Explain what comprises a system development methodology —the SDLC as well as models, tools, and techniques 10.3 Describe the key features of Agile development 10.4 Describe the key features of the Unified Process, Extreme Programming, and Scrum Agile system development methodologies

Essential Employability Skills

Communication

- communicate clearly in written, spoken, and visual form that fulfills purpose/needs of audience.
- respond to written, spoken, or visual messages in a manner that ensures effective communication.

Numeracy

- execute mathematical operations accurately.

Critical Thinking and Problem Solving

- apply a systematic approach to solve problems.
- use a variety of thinking skills to anticipate and solve problems.

Information Management

- locate, select, organize, and document information using appropriate technology and info systems.
- analyze, evaluate, and apply relevant information from a variety of sources.

Interpersonal

- show respect for the diverse opinions, values, belief systems, and contributions of others.
- interact with others in groups in ways that contribute to effective working relationships.

Personal

- not applicable

Delivery Method

- Classroom: Course is delivered through scheduled synchronous teaching that may be face-to-face and/or virtual.
- Online: Course is fully delivered through asynchronous teaching.
- Hybrid: Course combines scheduled synchronous and unscheduled asynchronous teaching.
- HyFlex: Course includes both synchronous and asynchronous learning and the student can move between both components seamlessly.

Learning Activities

- Lectures
- Class Discussions
- Group Work
- Research
- Presentations
- Guest Speaker(s)
- Reflective Writing
- In-Class Exercises
- Case Studies

Resources Required

Books

Satzinger, Jackson, Burd, *Systems Analysis and Design in a Changing World*, 7th, Cengage Learning
ISBN: 9781305117204

Additional Supplies

USB Flash Drive
Minimum 8GB

Evaluation Plan

Grading Scheme

A	80% - 100%
B	70% - 79%
C	60% - 69%
D	50% - 59%
F	0% - 49%

Evaluation Method	Value (%)
Assignments	70%
Project(s) (20%) Reflection Activities (20%) Assignments (30%)	
Applied Activities(G)	30%
Case Studies (30%)	

ADDITIONAL INFORMATION

College

Academic Policies

Students must adhere to all academic policies. These are available on myCambrian as well as the College website at <https://cambriancollege.ca/about/official-documents-and-policies/academic-policies/>.

Prior Learning Assessment and Recognition (PLAR)

Students may contact the Pathways office at pathways@cambriancollege.ca

Transfer Credit

Students wishing to have courses from other programs or institutions assessed for equivalency and/or transfer credit should contact transfercredits@cambriancollege.ca.

Accessibility Services

Cambrian is committed to creating an inclusive learning environment where we support our students' success. Students who are registered with the Glen Crombie Centre can access accessibility and/or counselling services by:

1. Registering and scheduling an appointment through Clockwork in the Student Portal in myCambrian.
2. Contacting 705-566-8101 ext. 7420 or 7311, or
3. E-mailing accessibilityservices@cambriancollege.ca

Testing Practices at Cambrian

Many courses include major tests and/or final exams. The practice at Cambrian requires that these types of test situations involve proctoring to ensure academic integrity. Online tests/exams may employ a proctoring service to enable you to take your exam from a location of your choosing within a period specified by your instructor. When you are taking an online test/exam, the proctoring service may capture your video, screen, audio and web surfing particulars to protect academic integrity. Cambrian College collects, uses, discloses and retains personal information in compliance with the Freedom of Information and Protection of Privacy Act (FIPPA). Your personal information is being collected under the authority of the Ontario Colleges of Applied Arts and Technology Act S.O. 2002, c.8, Sched. F. This information will be used for the purpose of administering a test/exam through an online proctoring service acting as an authorized agent of the College. Please refer to Cambrian's Confidentiality of Student Records Policy for more details. If you have any questions regarding the collection of your personal information, please contact Vice President Academic, Cambrian College, 1400 Barrydowne Rd., Sudbury ON P3A 3V8, 1-705-566-8101.

Wabnode Centre for Indigenous Services

Students are encouraged to come to Wabnode to meet our Elders and to access personal counselling or academic tutoring. Our team will also be able to provide students with information related to funding and scholarship and bursary opportunities for Indigenous students. We encourage students to come to Wabnode for cultural, sports and community activities. Students can also contact Wabnode at wabnode@cambriancollege.ca

Copyright

Students may not submit work or partake in activities that infringe on the Canadian Copyright Act, or the related Cambrian College Fair Dealing Guidelines and Copying Guidelines. The guidelines may be viewed at: <http://cambriancollege.libguides.com/copyrightinfo> or by contacting the Library for questions related to copyright: library@cambriancollege.ca

Out-of-Class Assistance

The faculty will inform students of their Out-of-Class availability through the Learning Management System site (Moodle).

Audio/Visual Capture

Sounds and images from this class, and contributions made by a participant, virtually or in-person, are recorded under the authority of the Ontario Colleges of Applied Arts and Technology Act, 2002. The main purpose for these recordings is to allow students enrolled in this course, whether they attend the particular class in person, virtually, or at all, to review class content and activity.

These recordings may also be reviewed by faculty members to prepare future classes, to evaluate students, to collaborate in program/course development/review, or to provide feedback to students or other faculty. Any questions about this collection may be addressed to your respective Dean.

Equity, Diversity and Inclusivity

Cambrian is committed to building and preserving an equitable, diverse, and inclusive learning community where students, faculty, and staff may achieve their full potential in an environment characterized by equality of respect and opportunity. All students and employees have the right to live and work in an environment that is free from discrimination and harassment. Therefore, Cambrian College will not tolerate any form of discrimination or harassment in its employment, education, accommodation, or business dealings. For more information, please visit: <https://cambriancollege.ca/about/official-documents-and-policies/equity-human-rights-and-accessibility/>

Tests and Evaluations

Students are required to write tests and/or complete evaluations as scheduled. Exceptions may be made in the event of an emergency or a sanctioned event (e.g., varsity sports, field trip, religious observances, etc.). In non-emergency situations, students are expected to contact the faculty member in the event that they can not be present for a test/evaluation to explain the reason for their absence. At the discretion of the faculty member, an alternate time for the test/evaluation may be allowed.

Attendance

Regular attendance is strongly encouraged as it contributes to student success. Some courses have specific lab/participation requirements. Students are expected to be aware of, and adhere, to these requirements.

Modifications to the Course Evaluation Plan

Under exceptional circumstances, Cambrian reserves the right to alter the Course Evaluation Plan. Upon approval from the Dean, faculty members will notify students of any modification to the Course Evaluation Plan and post to the course Learning Management System site (Moodle).

School of Business and Information Technology, Creative Arts, Design, Music and Hospitality Regulations**Lab Attendance**

Lab attendance is mandatory since lab grades include an evaluation of lab reports and lab performance. Lab performance can only be judged in person, requiring that students attend all scheduled labs.
