

REPORT OF CLASS BUDGET

From 06-2009 to 10-2010

1. Finance information

Currency: VND

Table 1	Overview		Collection		Expenditure	
Figure	Beginning balance:	6,130,000	Beginning receivable:	373,000	Beginning payable:	2,500,000
	Total collection:	21,968,500	Total incurred debt:	7,275,600	Total incurred debt:	5,819,500
	Total expenditure:	27,777,000	Total returned debt:	4,021,000	Total paid debt:	8,319,500
	Ending balance:	321,500	Ending receivable:	3,627,600	Ending payable:	0
	Out-of-plan balance:	(876,500)	Bad debt (over 90 days):	3,627,600	Waste:	504,097
Ratio	Sustainable growth:	-39.67%	Returnable percentage:	0.00%	Expending performance:	97.41%
	Overcollection:	-4.39%	Independent collection:	73.51%	Net liquidity:	88.14%
	Overexpenditure:	11.88%	Completed collection:	81.66%	Expansion liquidity:	101.16%

Table 2	Activity	Union fee	Studying	Other col	Bank interest	Payable debt
Collection	1,877,000	0	7,170,000	6,949,000	153,000	5,819,500

Table 3	Studying	Sports	Social activity	Reward	Other exp	Payable debt
Expenditure	8,957,000	600,000	1,655,000	1,932,000	6,313,500	8,319,500

Chart of collection

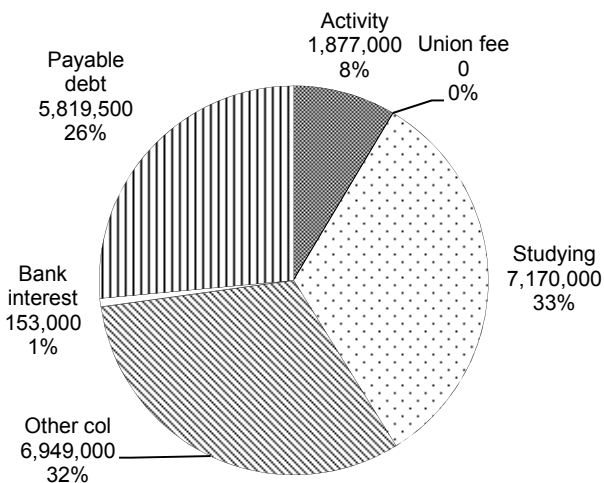

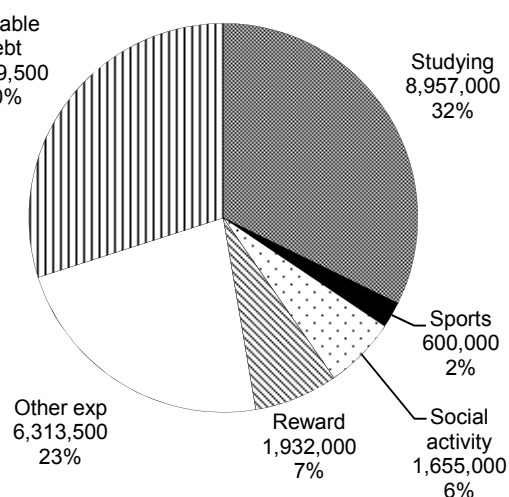

Chart of expenditure

Declaration of financial evidence				Table of debt interest	
Collection	Not available			Payable	Not available
Expenditure	22 payment bills 27 invoices 0 bank bill			Receivable	2.50% per month after incurring 30 days -8.33% from 4 months before to incurring day -10.00% before incurring day 5 months or earlier
	From	30/07/2009	to	23/10/2010	From 01/04/2010 to now

2. Budget distribution

From 01/06/2008 to 31/10/2010

Currency: VND

Ending balance: 321,500 Rewarding and party expenditure: 0
Sharable money: 321,500 Difference from sharable money: (1,000)

Explanation of budget distribution	
Contribute:	The sum of money without debt each student contributes in the above period.
Debt:	The money and debt interest which are not collected until the end of the above period.
Avg contribution delay:	The arithmetic average of the day of contribution delay in the above period.
Avg debt delay:	The arithmetic average of the day of debt delay in the above period.
Total:	The sum of values in each columns of figures (value of the whole class). The weighted arithmetic average of values in columns of average figures (average value of class). With the weight is the number of completely collected items or debt items of each student.
Point:	[contributed money X (1 + coefficient ratio of difference between con delay day and class average con delay day)] X [ratio of contributed money to total contribution and debt X (1 + coefficient ratio of difference between debt delay day and class average con delay day)] X [1 - ratio of debt to total class debt].
Percentage of receive:	The percentage of each student's point to total point of all students in the class.
Receive:	The product of sharable money and percentage of receive, rounded to the nearest multiple of 500.

Note: The above distributing method is not optimum. Because the average day of contribution delay may get negative value, so the weighted harmonic mean (the better method) cannot be used for decisive variables .
